

Trade Delegation from China Visits Capstone Nutrition to View Manufacturing Best Practices

Ogden, Utah, March 15, 2016 – Capstone Nutrition (“Capstone”), one of the largest non-branded contract manufacturers of health and dietary supplements in the United States, yesterday welcomed a trade delegation from China to its facility in Ogden, Utah. The delegation also received a special presentation from the Governor of Utah’s Office of Economic Development.

The delegation was from the China Health Care Association, one of the largest and most highly regarded trade organizations for China’s health and dietary supplement industry. The US supplement industry is well respected in China, and the group was invited to the US to learn about industry best practices and deepen trade relationships. Prior to visiting Capstone, the delegation attended the Natural Products Expo West, one of the industry’s largest trade shows that attracts over 70,000 attendees to Anaheim, California.

“We were honored to host the China Health Care Association at our state-of-the-art manufacturing facility in Ogden, Utah,” said Jared Leishman, Chief Executive Officer, Capstone Nutrition. “We hold several of the industry’s toughest certifications, and we pride ourselves on the exceptional, industry leading quality of our manufacturing.”

“An important part of the United Natural Products Alliance’s charter is to advance the health products industry by fostering trade between the US and other markets,” said Loren Israelsen, President, United Natural Products Alliance (“UNPA”). “We were delighted to welcome the China Health Care Association to Utah to witness industry best practices first hand and to showcase Capstone’s dedication to quality and safety.”

Utah is the global capital for the natural health and dietary supplement industry. Capstone was selected by UNPA as a model manufacturer to educate this elite delegation.
